

MILESTONE – SYSTEM FUNCTION & PURPOSE DOCUMENT

Purpose:

Milestone is an educational growth platform designed to help students track achievements, build portfolios, access AI tools, and connect with schools for verification and career guidance.

Core Objectives:

- Document student growth
- Build verified portfolios
- Enable communication
- Provide AI support
- School integration

User Roles:

- Super Admin – full platform control
- School Admin – manage school data and verification
- Teacher – assign tasks and validate student work
- Parent – track child growth and view reports
- Student – build profile and upload achievements

Core Features:

1. Authentication with role-based dashboards
2. Profile system with parent-student links
3. Projects management with file uploads
4. Gallery & events for schools
5. Achievements verification system
6. Student levels (feature access control)
7. AI tools for guidance and matching

Workflow:

User signs up → Dashboard → Uploads → Verification → Portfolio → AI Assistance

Vision:

Build the largest verified digital portfolio system for students, where real achievements create real opportunities.
